LED downlighting module

Discover a Better Lighting Experience

L Series LED Downlighting Modules available in 4", 5", and 6" apertures.

Featuring solid-state technology and a thoughtful design, our L Series LED Downlighting Modules offer an easy way to enjoy a better lighting experience. Whether the project is new construction, renovation or retrofit, these modules provide an economical solution to bringing energy-efficient LED lighting into homes without sacrificing the warm look of traditional lighting.

- More than 80% more energy efficient than a comparable incandescent lamp
- Virtually maintenance free, lasting more than 17 times longer than traditional lighting sources
- Pays for itself in about one year
- Features focused optics that precisely direct light from the LED to the task plane
- Designed for use in new construction and existing homes
- Fits most popular IC and non-IC housings
